ABOUT AS

Core2code healthcare is one of the world leading academy providing certification programmes on the Healthcare IT sector. Among the various domains of Healthcare that include Clinical Healthcare, Healthcare financing, administration, research and information technology, we offer academic certifications to enter the field of Healthcare Information Technology.

Vision:
To enhance the degree of autonomy and self-determination by enabling individuals to represent their interest in a responsible way and invariably enjoy the well-being and economy

Mission:
Transform skills to prudence that in turn mutates to revenue by inspiring, educating and mobilizing a global community
To keep clients and their needs as the core of all our ideas by developing an easy and intuitive interface

What is Medical Coding and why is the buzz?

Medical reports containing confidential medical information are outsourced from international hospital portals to the Indian medical billing companies to process them to numerical codes that have assigned dollar values. Coder's duty is to report accurate codes for the services documented in the report. The codes are ICD (International Classification of diseases), CPT (Current Procedural Terminology) and HCPCS (Healthcare Common Procedural Coding System).

With the growth of Health information management technology there is a huge demand for medical coders across the globe.

Why do you need training in medical coding?

Medical coders operate on medical reports of various specializations as compared to the various departments in a hospital. Radiology, surgery and consultations are a few to name. A coder is required to comprehend the dictation of the doctor in the report and convert them to numerical codes that have a dollar value attached to it. Assigning a code of higher dollar value or of a lower dollar value accounts to improper billing of the healthcare service. Our training imparts comprehensive knowledge on human anatomy, physiology, pathology and US based procedures that result in correct coding of claims and boost the revenue management positively.

Courses Provided

Professional Medical Coder (PMC):

Duration: 1 month
Topics Covered:

1. Revenue Management, Medical Terminology, Human Anatomy, Physiology, Pathology, Clinical tests and Surgical Procedures.

2. ICD-10 CM General Coding guidelines, conventions and coding for acute and chronic conditions and late effect, Impending and Pressure ulcer stages Coding.

3. Chapter Specific Coding Guidelines including all the chapters like Infection, HIV, Sepsis, Neoplasm, Diabetes and Hypertension, Pregnancy and Delivery, Burns, Fracture, Laceration, Poisoning, Myocardial Infarction and Stroke Coding.

4. Introduction CPT-4 Procedure Coding Terminologies, HCPCS and Modifiers Coding.

5. Medical Billing, HIPAA Compliance and hundreds of coding practice scenarios.

Advanced Medical Coder (AMC)

Duration 40 Days

1. Revenue Cycle Management, Medical Terminology, Human Anatomy, Physiology, Pathology, Clinical tests and Surgical Procedures.

2. ICD-10 CM General Coding guidelines, conventions and coding for acute and chronic conditions and late effect, Impending and Pressure ulcer stages Coding.

3. Chapter Specific Coding Guidelines including all the chapters like Infection, HIV, Sepsis, Neoplasm, Diabetes and Hypertension, Pregnancy and Delivery, Burns, Fracture, Laceration, Poisoning, Myocardial Infarction and Stroke Coding.

4. Introduction CPT-4 Procedure Coding Terminologies, HCPCS and Modifiers Coding.

5. Medical Billing, HIPAA Compliance and hundreds of coding practice scenarios.

6. Specialty training on consultation coding and surgery coding with dummy charts. Live on-hands medical coding experience. Exclusive training material will be provided.

7. Sample CPC preparation modules and questions for the American certifications. Exclusive discounts on the CPC examination registration with AAPC

CPC Certification Workshops:

Duration: 80 Hours

Weekends:1classes + 2 exclusive CPC Mock examinations

Topics covered:

1. MEDICAL TERMINOLOGY REFRESHER
2. ANATOMY – 12 Topics
3. INTRODUCTION TO ICD & ITS OFFICIAL GUIDELINES
4. INTRODUCTION TO CPT
5. MODIFIERS
6. EVALUATION AND MANAGEMENT
7. ANESTHESIA
8. SURGERY
9. RADIOLOGY
10. PATH & LAB
11. MEDICINE
12. HCPCS
13. MEDICAL BILLING AND COMPLIANCE
14. QUESTION PRACTISE SESSIONS
15. CPC EXAM PREPATION TEST SERIES

Online Training Courses:

Candidates who live away from the vicinity of the academy can avail the online training facility by contacting our team of Educational Counsellors available at our helpdesk.

You will be guided on a simple four step process to register to the online training facility.

Classes will be conducted by certified trainers and doctors on a one on one basis.

Call us for further clarifications.
